DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

John McAbery
P.O. Box 163
Petrolia Ca 95558
12. 9. 99

Mr. Richard Meserve
U.S. Nuclear Regulatory Commission,
Washington, D.C 20555

Dear Mr. Meserve.

I am vehemently opposed to the proposed rule that would allow radioactive materials from power plants and weapons facilities to be recycled into the scrap metal market place

Once this toxic material is added to the scrap metal supply it will be completely untraceable and could end up anywhere — braces for children, pacemakers, kitchen utensils - absolutely any metal products.

Please find a way to keep this material out of the metal supply and away from all humanity

Thank you
John McAbery
