DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

6-E Research Rd.
Greenbelt, MD 20770
12/12/99

DOCKETED
USNRC

'00 JAN 12 P2:40

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Chairman Richard Meserve
U.S. Nuclear Regulatory Commission
Washington DC 20555

I have just learned that there is a program to release low level nuclear waste as raw materials for the manufacture of household goods. I can't believe that you think the public will not erupt in great anger at this, and that we will not see it as a betrayal of the very shaky trust we now invest in you. I am asking the Nuclear Regulatory Commission to isolate radioactive waste and materials and anything they contaminate, no matter what level. I understand the difficulty of disposal, but the public is not your garbage can! The radioactive legacy of atomic weapons, energy production and even medicine should be isolated from the public and the environment. Using radioactive wastes in consumer products poses unnecessary avoidable, involuntary, uninformed risks. The consumers, the producers, the raw materials industries don't want these radioactive wastes or risks.

Sincerely,
Sherna Comerford
