DOCKET NUMBER
PROPOSED RULE PR 20
(64FR 35090)

DOCKETED
USNRC

To Nuclear Regulation Comission

'00 JAN 18 A10:59

I am writing to plead, urge and demand that you keep radioactive wastes and materials from nuclear power and weapons isolated from the public and the environment, and prohibit any "releases" from regulatory control! You must prohibit radioactive materials from entering the consumer marketplace or anywhere but lisenced radioactive facilities! You must recapture what has been released, and work for an international prohibition on radioactive "release".

Words cannot express the severe urgancy, the ~~severe~~ extreme desperateness of this situation!

You must not allow this catastrophe!

Sincerely,

Emily Keene
