

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

366

From: <kborden@ajc.com>
Date: Mon, Dec 20, 1999 3:05 PM
Subject: Rulemaking and Adjudication

DOCKETED
USNRC

'99 DEC 21 P 4:25

I have just read an editorial written by Sara Barczak regarding the use of "recycled" parts from closed nuclear facilities in everyday items.

O.
NRC
ADJUDICATION

THIS IS APPALLING!!!!

I can not stand by and watch my children be exposed to unnecessary amounts of radioactivity. This is estimated to cause 108,000 additional deaths a year, however I guess it doesn't matter to the NRC until one of their family members is affected by this extra radiation !

What are you people thinking??? I cannot and will not sit idly by while I am forced to live in a home that, do to the NRC's profiteering ignorance, could potentially make my loved one ill or cause their deaths!

I am pleading with you to reconsidered these actions. The American people do NOT want this!!

Thank you,

Kelly Borden
