DOCKETED  
12 20 1999

'99 DEC 21 P4 127

NRC Chairman Richard Reserve

The Nuclear Regulatory Commission and Department of Energy's desire to indiscriminately expose the citizens of the U.S. to radiation in innumerable house hold items is the most insane proposal I have ever heard. No one should have the power to mandate such a ludicrous proposal. One cannot help but wonder what the reasoning behind this is. The public should never be exposed to radiation indiscriminately and against their will. These materials should definitely be isolated.
