Dear Mr. Meserve,  
This message is in regards to your recycle and reuse concept on the proposed new rules by the Nuclear Regulatory Commission. I would like for my concerns to be heard. I beleive that your idea of recycling is a very unhelathy idea, and harmful to human health and the environment. I say this as an environmental scientist who has studied this subject matter. I would like to see that these materials that you are proposing to recycle and reuse be isolated from the public. Futhermore, I would like to see the NRC extend the deadline for the public comment period, to allow for a fair evaluation of its proposal. Thank you for taking the time to listen to my concerns and to act upon them.
