Subject: Low-level radioactive material recycling in consumer products.

'99 DEC 21 P4:27

Dear NRC, I oppose having low-level radioactive material recycled into consumer products. I am asking for the time for citizens opinions to be extended for at least one year. The average citizen is not aware of this, and would oppose it if they knew about it. It is a crime what you are attempting to do without giving the average citizen a chance to reply. There has not been any major stories in the newspapers about this, and there needs to be news about this proposal. I will be praying to God for God's judgement to fall on those people in the NRC who are betraying the best interest of Americans. May God deliver us from corruption!
Yours truly, Victorio Berelli
