(64FR35090) RECEIVED

'99 DEC 21 P 4:27

Dear Sir/Madam:

I would like to voice my amazement and concern that the NRC is looking into AD putting radioactive metals into items that people, probably ALL over the world, will someday use.

Isn't it bad enough that we have all ruined the water and air in most of the world already. Now we must bring the pollution into the very chemical makeup of our household lives??

Please let this email be noted among (hopefully) the thousands you have received that is AGAINST SUCH PRACTICE.

Thank you.
