Subject: Radioactive contamination

'99 DEC 21 P 4:26

I have no grandchildren, and yet I would like to leave a legacy of life to our lands and to our children.

How dare you compromise the people with your interpretation of recycling. The air we breathe is dangerous enough, the water we drink has more chemicals in it than is necessary, and now you consider recycling radioactive materials in to our daily lives. If any of you have a conscious please reconsider this act.
