Secretary  
US Nuclear Reg  
Washington DC 20555

Dear Secretary,

I am writing because I'm worried about the DOE/NRC practices of recycling nuclear waste products to resale dealers & to manufacturers of new products. I've read that no warning labels inform consumers about possible radioactive content of these products.

No dose of radioactivity is acceptable in consumer products if at all avoidable. Set standards that protect all of us and the environment we live in. Don't let industry make the rules.

Sincerely,  
Pamela Schmitt
