US Nuclear Regulatory Commission,

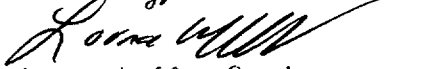

This is to comment on the 'clearance/release/recycling' of radioactive material from nuclear weapons complexes and decommissioning of nuclear power plants.

I cannot believe this is even up for discussion! Are you crazy? Not even you will know if the fork you handle or the zipper you zip has radioactive material in it. And your loved ones? What about them?

This is an on going subject on my show. I consider this an INSANE plan and all of you need to be sued and thrown out of your jobs. And if it does go through, there is only one gratifying thing about it - that you too will suffer from its consequences.

Radioactive material must be isolated for all time. Do not treat it lightly!

Sincerely,

  
Lorna Moffat-Producer
