**UNITED STATES
NUCLEAR REGULATORY COMMISSION**

WASHINGTON, D.C. 20555-0001

December 27, 1999

The Honorable Charles S. Robb
United States Senate
Washington, DC 20510-4603

Dear Senator Robb:

I am responding to your letter to Mr. Dennis Rathbun of November 23, 1999. You asked us to review an e-mail that was sent to you regarding "stockpiling land field's in Virginia to be sold off."

The author of the e-mail seems to be concerned that improper activity has taken place at the Surry and North Anna Nuclear Power Stations by forwarding new copper wire to land fields and subsequently auctioning off the land fields. This activity is stated to have occurred a long time ago (the author states "for a long time I've been silent.").

We have reviewed the subject e-mail and determined that there is no safety issue of concern, and the copper wire in question would not seem to be radioactive (the author states that it "is not scrap, it's all new wire."). Therefore, this is not an activity regulated by the U.S. Nuclear Regulatory Commission.

We believe the Virginia State Police is the appropriate authority to deal with this matter. However, we are reluctant to forward the e-mail to them because the author's name is unknown to us, and followup would require them to contact your office. Therefore, we suggest you forward the subject e-mail to them and include the author's name.

Sincerely,

A handwritten signature in black ink that reads "William D. Travers".

William D. Travers
Executive Director
for Operations
