Bob - I'm back acting for myself (this week). It seems to me that the last sentence in the second paragraph could be more clear (technical review may identify issues beyond those which an administrative review would identify?) - but you have my concurrence.

Regards,

Bill:

I understand you are acting for Bruce. Please review the attached letter to Dow and provide your input or concurrence directly to Robert Nelson. I have concurred on the letter and Janette Copeland, our Licensing Assistant, is not in today.

Ed Kulzer and Peter Lee are familiar with the subject. If you have any question, please talk to them regarding the technical details.

Thank you.

Sam N.
