

December 16, 1999

Mr. Brian A. McIntyre, Manager
Advanced Plant Safety and Licensing
Westinghouse Electric Company
P.O. Box 355
Pittsburgh, PA 15230-0355

SUBJECT: DOCUMENTATION APPROVAL FOR THE AP600 DESIGN

Dear Mr. McIntyre:

By your letters dated September 29, 1999 (DCP/NRC 1455) and December 10, 1999 (DCP/NRC 1457), Westinghouse submitted the 9/99 and 12/99 revisions of the AP600 Design Control Document (DCD). The U.S. Nuclear Regulatory Commission (NRC) staff has completed its review of both revisions, has verified that all of the changes are acceptable, and has determined that the AP600 DCD (12/99 revision) can be referenced in the final design certification rule for the AP600 standard plant design.

The enclosed supplement to the Final Safety Evaluation Report (FSER) for the AP600 standard plant design (NUREG-1512) documents the NRC staff's review of Westinghouse's changes to the AP600 design documentation since the issuance of the FSER and the resolution of the confirmatory items identified in Section 1.9 of the FSER. This supplement constitutes part of the staff's basis for issuance of the final design certification rule for AP600, but it does not affect the staff's findings in NUREG-1512. A notice of availability will be forwarded to the Office of the Federal Register for publication.

Sincerely,

/RA/

Jerry N. Wilson, Senior Policy Analyst
License Renewal and Standardization Branch
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

Docket No. 52-003

Enclosure: NUREG-1512, Supplement No. 1
