Subject: Comment on Proposed Rule (ATTN: Rulemaking and Adjudications)

'99 DEC 22 A 9:01

Dear Mr. Meserve-

This note is to protest the very short public comment period (ending tomorrow, December 22) on the proposed rule which allows incorporation of radioactive waste material into structural steel and other materials.

OFF
FILE
ADJUT

At the very least, the liability alone would seem to make this proposal unworkable. This liability is separate from the introduction of a "new" radiation risk which is entirely avoidable and unnecessary!

Please allow common sense and guarding public health and safety to override any economic gain that might result from this proposed procedure.

Thank you for your time and consideration.

The very best to you and your family this Holiday season.

Dan Paschal, Ph.D.
