Re: Nuclear Waste in the Consumer Stream  
Comments:

OFFICE  
ADJUTANT

The concept of permitting low level nuclear waste into the consumer stream is unconscionable, immoral, and in the NRC's case, indefensible. If in fact, this concept becomes practice, one could point to this decision as the point at which nuclear energy went from being a failed experiment to a blatant and conscious assault on our children and their children. -Citizen's Regulatory Commission  
Waterford, Ct
