Subject: radioactive waste

DOCKETED
USNRC

'99 DEC 22 A 9:02

Email I received recently from a friend alerted me to the news that NRC is considering an idea so ludicrous I thought it was a joke. The idea: use radioactive waste in the making of household products: jewelry, batteries, braces, etc.

OFFICE OF THE
ADJUTANT GENERAL

What an amazing idea, what a stupid idea.
Is this a joke?

Need I say, I am against it? Do I need to explain why? I hope not.

Sincerely,
Shirley Moore
