Dear Chairman Meserve: This letter is concerning the possible selling, recycling of metal, etc. from shut down nuclear power plants. Although I am all for recycling I feel that this waste needs to be disposed of properly and that does not include turning it into household items. There really is not a safe level of radiation, we are all already exposed to more hazards than we should be, why add to that? Thank-you kathleen a king, 2130 Silver Hill Rd., Stone Mountain, GA 30087
