Subject: Reusing radioactive metals

'99 DEC 22 A9:00

I would like to register my vote AGAINST the reuse of radioactive matter in recycling.

Such a practice is alarming and treating to our society's well being. I believe that we are bombarded daily with enough toxins and background activity already. It seems we should be finding new ways to reduce this invasions, not increase them.

I realize that as a commission, you are compelled to make decisions. But I would implore you to be cautious in making decisions which could potentially have such a negative effect on our community. Please remove yourself from the ivory tower. Take a step back and reflect on this from an individuals perspective not a decision making board point of view. Make the right choice, do not do this!
