Dear Sir (Mr. Richard Meserve):

I was very concerned to hear of your agency's plan to allow contaminated scrap into the mainstream market. If the information presented in the December 20 issue of The Atlanta Constitution is true, I believe it would be a grave error to allow base materials which we come in contact with in everyday life to be contaminated in such a manner. At the very least, the deadline for public input should be pushed at least to the middle of 2000 and be broadly publicized to allow everyone a chance to voice their opinion and to allow for more conclusive scientific data to be gathered.

Sincerely,  
Bobby Hunton
