Attention: NRC Rulemakings and Adjudications Staff

Dear Chair Richard Meserve:

OFFICE
OF THE
ADMINISTRATIVE
SUPPORT

Please, do not let the Nuclear Regulatory Commission continue recycling radioactive waste into our consumer products. The public must be protected from this deadly material.

The natural radiation that we encounter cannot be avoided, but do not use that as a justification to endanger us with additional exposure in products that we will use daily.

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

We need you to extend the time for making comments. Most people are not aware of this impending threat. When they find out what was done to them, there will be a lot of anguish and fear. This matter is so important. You must act wisely and it must be presented to the public for a full debate.

We trust in you to do the right thing.

Very sincerely, Barbara Bailine

ps. I am mailing and faxing confirmation of this E-mail as you requested.
