Subject: Regarding recycling of radioactively-contaminated materials

DEC 22 1999

Dear sirs:

I insist that radioactively-contaminated or radioactive materials, regardless of level, be restricted from recycling into consumer products, building materials, or the environment accessible to humans in the US and outside the US. This is consistent with the expressed wishes of the recycling community.

AD

SECRET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

I also want the radioactively-contaminated or radioactive materials brought back from the human-accessible environment, in those cases where there has already been a release.

Please adapt your rulemaking to accommodate these concerns.

Richard Geary
