Dear Sirs / Mmes.

I just read a disturbing editorial in the Atlanta Journal regarding your proposal to release Radioactively contaminated material into the Recycled products market.

OFFICE  
ADMIN

As a concerned citizen, I implore you to take more time and do further study of the permanent effects of this policy. Please do not risk further damage to this country's natural resources or introduce health risks to the population of this country without in-depth research. I am deeply disturbed that other nations are already allowing this to happen. As Americans, we have an obligation to think and act responsibly.

DOCKET NUMBER  
PROPOSED RULE **PR 20**  
(64FR35090)

I understand that some action must be taken to deal with the growing amount of nuclear waste that is a byproduct of the industry, and I respect the fact that your organization is working to develop solutions to this issue.

I am very interested in any information you may have supporting this policy. I recognize that I do not have all of the information to make a judgement on this issue.

I implore you to delay any action on this proposal.

Sincerely,

Jay Silverman
