It greatly concerns me that radioactive metal is being sold by the DOE to scrap metal dealers. Radioactive waste being recycled into consumer products, such as zippers, eye glasses, silverware, baby carriages, and virtually anything made from copper, steel, aluminum and concrete is not acceptable. **NO DOSE IS ACCEPTABLE!** Exposure to radiation should be avoided as much as possible. Radioactive waste should be stored responsibly, instead of made into new products that are hazardous to our health.

Please help protect our families and communities,

Sincerely,

- Susan Schlegel, PDR
