ADJUDICATIONS STAFF

Richard Meserve, Chairman  
Attention: Rulemaking and Adjudications Staff  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Staff:

I am informed that you are considering a rulemaking regarding allowing very slightly radioactive materials to be used in consumer products. (But I could not find this on your website at ruleforum.lanl.gov). In principle, the recycling of materials with de minimis amounts of radioactivity should be encouraged. Of course the question is how radioactive, and for what uses. I trust you will do a careful job of analysing these factors.
