Re: Scoping of NRC proposed rule for RADIOACTIVE 'RELEASE' and 'RECYCLING' into the marketplace, regular landfills, incinerators, etc.

We call on the NRC to fully regulate and isolate radioactive wastes and materials and anything they contaminate. These materials must be isolated, not released, at any level.

We do not want nuclear power and weapons wastes "released", "cleared", deregulated, exempted, generally licensed, designated "de minimis", or in any way allowed out of nuclear facilities.

The current methods of releasing radioactive wastes from commercial licensees and weapons facilities must immediately cease.

Do not under any circumstances release radioactive waste into consumer products.

We are totally opposed to the NRC in any way legalizing the recycling of radioactive wastes into the marketplace. Radioactive waste must be isolated from the environment, not recycled into the environment!! No amount of radiation is safe. Any amount of radiation released into the environment poses a risk to human health that is unacceptable.

Furthermore, we demand the reporting and recapturing of already-released wastes and materials into the environment and marketplace.

Signed,
