Dear Secretary:
(U.S. Nuclear Regulatory Agency)
Washington D.C. 20555

att: Rulemaking & Adjudications Staff

Please be informed that I am unalterably opposed to recycling of radioactive waste material into consumer products.

Radiation is not something to be 'toyed' with. To expose human beings in any way, shape or form to radioactive materials is immoral.

The industry must be responsible for its containment until it is no longer reactive in any way far into the future!

Sincerely
Louise Frazier.

P.S. Please recall all scrap metal that has been radiated and contain it by industry.
