December 19, 1999

Dear Secretary,

I understand you are preparing to set standards to legalize large scale release of contaminated materials for recycling. With the rates of cancer going on in my community for unknown reasons, and the degradation of food and water sources nationwide, no level is acceptable. We've already messed up our environment too much, not knowing long term results of pesticides etc. Caution should prevail until we know more.

Sincerely,

Janet A. Moore
