DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

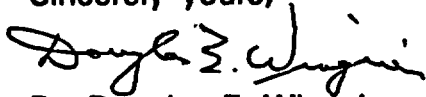

Attn: Rulemaking and Adjudications Staff

Dear Friends:

I write to urge you to outlaw all disposition of radioactive waste by recycling it into consumer products. If products made with these materials are sold to the public, untold numbers of people could be exposed to radiation through their braces, silverware, and virtually any other items.

I understand that you are getting ready to set standards to legalize the large-scale release of these contaminated materials (steel, aluminum, copper, concrete) for recycling.

I write to tell you that no dose is acceptable to me! Exposures to radiation should be avoided at all costs, not increased through an industry-supported set of rules!

Sincerely yours,

Dr. Douglas E. Wingeier
