

January 14, 2000

Mr. David J. Modeen  
Director, Engineering  
Nuclear Generation Division  
Nuclear Energy Institute  
1776 I Street, NW, Suite 400  
Washington, DC 20006-3708

Dear Mr. Modeen:

To support the development of the draft comprehensive fire protection regulatory guide (DG-1094) and to provide interested stakeholders with the basis for the technical guidance contained in the draft guide, the U.S. Nuclear Regulatory Commission (NRC) has completed the initial version of the electronic database as discussed during the public meeting of February 25, 1999. This database contains the draft regulatory guide, which was issued for public comment in October 1999, and the source documentation used in the development of the guide including; generic letters, information notices, internal memoranda, branch technical positions, standard review plans, etc. The documents are stored in Adobe PDF format and are linked to the specific positions contained in the draft guide. The staff has placed a copy of the database in electronic compact disk (CD) format in the NRC public document room. A copy of the CD is enclosed for your information and use.

After the issuance of the final version of the comprehensive fire protection regulatory guide, the staff will update the database and make it publicly available for interested stakeholders.

Please contact Mr. Edward A. Connell of my staff at (301) 415-2838 if you have any questions or need additional information.

Sincerely,

**/RA/**

John N. Hannon, Chief  
Plant Systems Branch  
Division of System Safety and Analysis  
Office of Nuclear Reactor Regulation

Enclosure: As stated

cc: see attached
