Subject: Export license of U235 to Japan / Our Ref: GBM-2389 / Change in U weight
NRC ref.: License Number XSNM03099, Docket Number 11005132

Dear Ms. Wright,

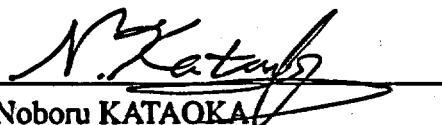

We have a situation where we have to change uranium weight for the said export license. The corrected weight information is typed on the attached sheet. Here we have slight increase in weight.

We are sending the attached application to you by Fedex today.

The shipment is now scheduled late January, 2000. We worry about the timing. Please kindly support us to obtain a permission of this change as soon as possible. Our Tokyo office will contact the government of Japan after US-DOT is informed of this issue.

We appreciate your support.

Sincerely yours,

Noboru KATAOKA
Manager - Nuclear
Energy Department,
