Revision to  
application

Dear Mr. Hauber:

Recently, SPC submitted an export application to ship SNM to NFI in Japan for use in Hokuriku Electric Power's, Shika Unit 1 reactor. Your office gave this application docket number 11005180 and license number XSNM03130.

Betty Wright advised me that since that since this is the first U.S. material being supplied for this reactor, Executive Branch review is required. Accordingly, please modify our export license application request to indicate that this is an initial export of U.S. material for Shika Unit 1, rather than a "fuel reload".

A check for \$3,900 to cover the addition expense for the Executive Branch review is enclosed.

If you have any questions, please contact me at (509) 375-8380.

Very truly yours,

D. L. Noss  
Senior Scientist, Safeguards
