

DOCKET NUMBER
PROPOSED RULE **PR 20**

(64FR35090)

593

From: "Joan O. King" <joank@alltel.net>
To: OWFN_DO.owf5_po(SECY)
Date: Wed, Dec 22, 1999 3:17 PM
Subject: Release

99 DEC 27 AM 06

ATTENTION: NRC Rulemaking and Adudications Staff

Regarding rulemaking 64 FR 35090, 6 - 30 - 99

I am not a nuclear professional, but neither am I without some background in nuclear technology. I have used a Geiger counter and discovered radiation in places it didn't belong like dishes from Mexico and on the floor of a building across from the Capitol in D.C. Even without recycling of radioactive metal, radiation is spreading through the environment.

It is totally reckless and unacceptable for the NRC to facilitate this contamination by allowing radioactive metal to be recycled. We know there is no level of radioactivity that doesn't carry some degree of risk, even naturally occurring background radiation which some think contributes to the cancer rates.

How can you even think of releasing more radiation into the general environment? Frankly, you people must be mad!
