Subject: Radioactive release rulemakings 64 FR 35090, 6-30-99

(64FR35090)

Dear NRC Rulemakings and Adjudication Staff,

I am deeply concerned about the recent consideration to use radioactive waste in the mainstream products for the American (and possibly worldwide) consumer. Radioactive waste should not be used in consumable products. We are digging our own graves. Considering the current practice of the Atomic Industry to try to dump their waste on consumers, we are spreading this poison around to the citizens of our country. I urge you to stop immediately!

Radioactive waste along with nuclear proliferation throughout the world remain one of the most compelling and disasterous consequences of our nuclear age. I urge you to shut down all production of radioactive materials of any kind and cease this insanity now. Our grandchildren will consider you a hero. Consider the facts. We do not need more cancer victims. It is in your hands. It is more than a job. It is a lifelong guilt that you have not acted when you could have to stop this madness.

I sincerely hope you will come to your senses and stop radioactive material production and proliferation.

For peace,
Michael Mazzetti
