DOCKET NUMBER  
PROPOSED RULE PR 20  
(64FR35090)

666

I am quite concerned about the possible release of radioactive metals into our general metal supply. We have enough harmful materials and chemicals in our largely artificial environments already. Why add more?

This whole thing is a ridiculous ploy to foist radioactive waste onto an unsuspecting public. Please work to protect us from this danger.

Yours sincerely  
Sue Ellen Davis
