Dear Director-Shirley Jackson, John Minns,Peter Crane,

CH
ADJ

Merry Christmas to you all!!!!!! May Christ come and help you with this most difficult task of shutting all those nukes down. Please shut these nukes at Indian Point for Y2K.... and across the nation.they are mucho dangerous.

Also this is the last day to comment on nuclear radioactive recycling??? Are you guys and gals totally crazy?? Recycling radioactivity..is that a joke? What will you do next ?start recycling the bubonic plague..? Already we have radioactive smoke detectors..next , get your red hot radioactive silverware and then throw in salt and uranium shakers!!!!!! Please, Someone has to stop this madness out there in

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

NRC LAND .I wrote you a letter already, but didnt get it answered.

If I said I was going to bomb the NRC you would have a thousand cops after me.....but Shirley, you and the guys over at the NRC are already bombing the public-bombarding the American people and the entire environment with radiation everyday that you allow these dinosaur reactors to operate....its like a slow bomb.(sometimes chernobylly not so slow), continually exploding into our bodies and our world. This is a failed technology whose time is over(and even then it will last for centuries) And you all know it too, I've talked to some of you. The only regulation is shutdown. In God's name please stop this madness.

Truly in Gods' name and Love,and
for our children and their children,
Michele Riddell
