RECEIVED  
DEC 29 1999

ARC Chairman

Richard Messum:

Only now learned  
of your considering releasing  
radioactive materials into the  
market, for use in products  
where people are.

I can't conceive of any -  
thing more evil than considering  
releasing such material into the  
public, except actually doing it.  
Government agencies have  
little public respect left, Don't  
add this cancer, and no one knows  
what else. out to living public,  
and unborn one.

Thank you

W.H. Avery
