OFFICE
ADJUDICATIONS

Dear Chairman Meserve:

Please stop the recycling of radioactive waste into consumer products and to isolate these materials and anything they contaminate. The public must not be exposed to these radioactive substances in the market. Making products of radioactive waste & then dispersing them unlabeled thru the economy is NOT an acceptable way of handling our country's radioactive waste problem.

DOCKET NUMBER
PROPOSED RULE **PR** 20
(64FR35090)

Because some materials have naturally occurring radiation does not mean that additional radiation from radioactive waste in consumer products is acceptable.

The NRC should extend the comment period on its proposal to release radioactive waste into the marketplace until September 2000. This issue is should be fully debated by the public.

Peace,
Kathy Van Dame
