DOCKETED
12/31/99

'00 JAN -3 P12:04

Dear Chairman

C
AD

DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

Currently the NRC is planning to a change in policy which would allow radioactive materials from decommissioned nuclear reactors, weapons manufacturing, etc., to enter the general US consumer pool as "recycled materials". I urge you to do whatever you can to reverse this policy change. Recycling nuclear waste by spreading throughout consumer households is a truly foolish approach to managing nuclear waste.

Again, I urge you to do whatever you can to stop this change. Nuclear waste should be isolated and treated like the dangerous substances that they are.

Sincerely ,

Richard Montgomery
Mathematics Professor
University of California
Santa Cruz
