DOCKET NUMBER  
PROPOSED RULE PR 20  
(64FR35090)

DOCKETED  
1999

'00 JAN -3 P3:55

OFF  
AD

Secretary  
U.S. Nuclear Regulatory  
Washington, DC 20555

Dear Secretary:

No dose is acceptable! Radiation exposure should be avoided as much as possible, not increased through an industry backed rule making.

The generators of radioactive waste have the obligation to store it responsibly and not pass it off on anyone else. Allowing it to be used in products that are sold to the public is totally unacceptable.

Sincerely,  
*Henry Schwartzman*
