DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

Dear Agency Secretaries sworn to uphold the public trust:

I understand that the U.S. Nuclear Regulatory Commission is in the process of leaglizing the release of radioactive materials from licensed, regulated control into raw materials, building supplies, and items with which we come into daily contact. I also understand that the Department of Energy is curently sending radioactively contaminated meatls from nuclear weapons sites to regular scrap yards to mix with clean metal for unrestricted public use.

This is extremely alarming!

There is no safe level of exposure to ionizing radiation. Americans are being exposed involuntarily, and without consent or information. Our disease risks are being increased unnecessarily. This action harms us physically and also will certainly harm American's relationship with government and industry. It shows recklessness disregard for our wellbeing and is bound to create anger and a feeling of alienation.

Please do whatever you can to stop this!

Regards,

Noemie Maxwell Vassilakis
