Subject: radioactive nickle recycling

'00 JAN -5 A0:44

Why are you not burying it?? LOTS of money has been spent to find suitable sites that will last tens of thousands of years for our radioactive materials. BURY ALL RADIOACTIVE STUFF!!!

OF
ADD

I don't want to have the zipper I'm wearing cause me to get cancer. This should have never come up. It's radioactive from power plant use yet it is going to be recycled. Are you crazy??? Stop this insanity now! Put it where all of the other radioactive stuff is going to be: very deep underground for a very long time. If we can build the Hoover Dam and split the atom what's so hard about digging a very large and very deep hole to bury radioactive stuff? BURY THE NICKEL NOT ME WITH CANCER!!!

You don't need to e-mail me a response. Simple stop it now and stop it forever!!!
