**SUBJECT: INITIAL EXAMINATION - NRC INSPECTION REPORT 50-313/00-301;
50-368/00-301**

Dear Mr. Hutchinson

In a telephone conversation on January 10, 2000 between Messrs. Jerry Giles, Operations Training Supervisor, and Stephen L. McCrory, Chief Examiner, arrangements were made for the administration of licensing examinations at Arkansas Nuclear One, Unit 2, during the week of April 24, 2000.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 8, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

Your staff agreed to furnish the examination outlines by January 18, 2000. To meet the examination administration schedule, your staff agreed to deliver the written examinations by February 22, 2000, and the operating tests by March 20, 2000, with the supporting reference materials identified in Attachment 2 of ES-201. Any delay in receiving the required examination and reference materials after these dates, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled. A validation of the final examination material will be conducted at your facility the week of April 3, 2000.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024),

and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0101, which expires on April 30, 2000. The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, or by Internet electronic mail at BJS1@NRC.GOV; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0101), Office of Management and Budget, Washington, D.C. 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Giles has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Stephen L. McCrory at 817/860-8172, or John Pellet at 817/860-8159.

Sincerely,

/s/

John L. Pellet, Chief
Operations Branch
Division of Reactor Safety
