OFFICE OF THE  
FEDERAL REGISTER  
ADJUTANT GENERAL

Dear Secretary of Nuclear Regulatory Commission,

In regard to any legalizing the large-scale release of contaminated materials for recycling - and estimates of radiation doses from materials made with recycled radioactive copper, steel, aluminum and concrete - NO DOSE IS ACCEPTABLE!

Exposures to radiation should be avoided as much as possible, not increased through an industry-backed rulemaking.

Please - Don't do it!

Thank you for your consideration.

Sincerely,

Dolores G Meek
