Mystic, CT 06355

STAR (Standing for Truth About Radiation)
P. O. Box 4206
East Hampton, NY 11937

Dear Ladies and Gentlemen:

This is in response to your petition, received today, requesting that Northeast Utilities be directed to suspend operation of the Millstone Units 2 and 3 facilities.

Over the last three years the NRC, in conjunction with the nuclear industry, has developed a comprehensive set of procedures intended to address and minimize the potential that public health and safety concerns might be created at NRC-licensed facilities because of Y2K issues. The licensee for the Millstone facilities has informed the Commission that all safety-related systems are Y2K compliant, and, as a consequence, these facilities can be safely shut down should the need arise.

Your petition does not otherwise present any safety issues which would warrant the action you request and, accordingly, your petition is denied.

For your further information, I am enclosing a copy of recent correspondence from the Chairman to Senator Christopher Dodd and Senator Robert F. Bennett addressing Y2K matters.

Sincerely,

Original signed by:
Samuel J. Collins, Director
Office of Nuclear Reactor Regulation

PETITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF CONNECTICUT

We are calling on you to force Northeast Utilities (NU) to suspend operations prior to the year 2,000-(Y2K)-computer roll over period. Given the complexity and cascading effects that the Y2K computer bug can create, given that it is impossible to guarantee that nothing will go wrong, and given the catastrophic consequences of a worst case scenario accident, we, the citizens of this state, refuse to let NU to gamble with our lives and the lives of our children. We are calling on you to make NU:

- adhere to a "good corporate neighbor" policy and immediately place the unit 2 and 3 reactors in a cold shut down mode until all safety systems are tested post Y2K computer roll over period.
- have on site, enough diesel generator fuel for a minimum, 30-day period, for each reactor, including unit 1.
- triple the staff in the key areas of control room, and reactor core and spent fuel pool cooling systems.

We believe the financial cost incurred by NU to meet our safety demands will relieve the anxiety of the people, and be money well spent.

PETITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF CONNECTICUT AND NEIGHBORING STATES

We are calling on you to force Northeast Utilities (NU) Millstone Nuclear reactors to suspend operations prior to the year 2,000-(Y2K)-computer roll over period. Given the complexity and cascading effects that the Y2K computer bug can create, given that it is impossible to guarantee that nothing will go wrong, and given the catastrophic consequences of a worst case scenario accident, we, the citizens of this state, refuse to let NU to gamble with our lives and the lives of our children. *We are calling on you to make NU:*

- Adhere to a "good corporate neighbor" policy and immediately place the unit 2 and 3 reactors in a cold shut down mode until all safety systems are tested post Y2K computer roll over period.

**PETITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE
CITIZENS OF CONNECTICUT AND NEIGHBORING STATES**

We are calling on you to force Northeast Utilities (NU) Millstone Nuclear reactors to suspend operations prior to the year 2,000-(Y2K)-computer roll over period. Given the complexity and cascading effects that the Y2K computer bug can create, given that it is impossible to guarantee that nothing will go wrong, and given the catastrophic consequences of a worst case scenario accident, we, the citizens of this state, refuse to let NU to gamble with our lives and the lives of our children. *We are calling on you to make NU:*

Adhere to a "good corporate neighbor" policy and immediately place the unit 2 and 3 reactors in a cold shut down mode until all safety systems are tested post Y2K computer roll over period.

LETTER TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF CONNECTICUT AND NEIGHBORING STATES

We are calling on you to force Northern Utilities and Michigan Nuclear Resources to suspend operations prior to the year 2,000 (Y2K) computer roll over period. Given the complexity and cascading effects that the Y2K computer bug can create, given that it is impossible to guarantee that nothing will go wrong, and given the catastrophic consequences of a worst case scenario, we, the citizens of this state, desire to be notified to enable us to live and the lives of our children. We are calling on you to make NUT

Adopt to a "good corporate neighbor" policy and immediately place the next 2 and 3 reactors in a cold shut down mode until all safety systems are tested per Y2K computer roll over period.

PETITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF

CONNECTICUT

AND NEIGHBORING STATES

We are calling on you to force Northeast Utilities (NU) Millstone Nuclear reactor to suspend operations prior to the year 2,000 (Y2K)-computer rollover period. Given the complexity and cascading effects that the Y2K computer bug can create, given that it is impossible to guarantee that nothing will go wrong, and given the catastrophic consequences of a worst case scenario, accident, we, the citizens of this state, refuse to let NU gamble with our lives and the lives of our children. We are calling on you to make NU adhere to a good corporate neighborhood policy and immediately place the unit 2 and 3 reactors in a cold shut down mode until all safety systems are tested post Y2K computer rollover period.

2. Have on site, enough diesel generator fuel for a minimum, 30-day period, for each reactor, including unit 2. Include the staff in the low gross of control room.

3. The bill will financial cost incurred by NU to meet our safety demands will relieve the anxiety of the people, and be money well spent.

PETITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF CONNECTICUT AND NEIGHBORING STATES

We are calling on you to force Northeast Utilities (NU) to **immediately** restore to normal operations prior to the year 2,000 (Y2K)-computer roll over period. Given the complexity and extensive costs that the Y2K computer bug can create, given that it is impossible to guarantee that systems will go wrong, and given the catastrophic consequences of a worst case scenario, we, the citizens of this state, refuse to let NU to gamble with our lives and the lives of our children. We are calling on you to make NU

Adopt a "good corporate neighbor" policy and immediately place the units 1 and 3 reactors in a cold shut down mode until all safety systems are tested post Y2K computer roll over period.

PEITION TO STATE AND FEDERAL PUBLIC OFFICIALS REPRESENTING THE CITIZENS OF CONNECTICUT AND NEIGHBORING STATES

We are calling on you to force National Wildlife Refuge (NWR) to suspend operations prior to the year 2000. The suspension will prevent the NWR from carrying the environmentally sensitive sites that the NWR occupies by 400 acres. Given that it is impossible to guarantee that NWR will be opened and given the catastrophic consequences of a worst case scenario as detailed. We, the citizens of the State of New York, call on you to force NWR to suspend all operations. We are willing to give you to force NWR:

1. Adhere to a forest separate settlement policy and immediately grant the use of land 2 (subject to a final final decision made until 4/1/00).
2. Have an independent judicial review of the NWR operations for each year. The suspension will be in accordance with 2.
3. Drop the staff in the key areas of the NWR, including the staff that will be used to manage the NWR.

We believe the suspension will be in the best interest of the people and will be passed with speed.
