**OTHER INFORMATION: RESPONSE TO CONGRESSIONAL INQUIRY REGARDING
RELEASE OF SOLID MATERIAL CONTAINING VERY LOW LEVELS OF RADIOACTIVE
MATERIAL (SP-00-001)**

On October 25, 1999, the Chairman received a request from the United States House of Representatives, Committee on Commerce (Congressmen Dingell, Klink and Markey), regarding the State of Tennessee's approval of a license amendment to Manufacturing Sciences Corporation authorizing the release of solid material containing very low levels of radioactive material. We corresponded with you regarding this request on November 2, 1999 (SP-99-074).

This is to notify you that NRC's December 20, 1999 response, signed by the Chairman, has been posted to the Office of State Programs' web site on the "What's New page, <http://www.hsr.d.o.r.n.l.gov/nrc/whatsnew.htm>, or you can go directly to it at <http://www.hsr.d.o.r.n.l.gov/nrc/special/dingell.pdf>. I want to take this opportunity to express our appreciation for your assistance in responding to our request for information in SP-99-074. Please note that some of your responses suggest that there is a need for clarification, particularly with respect to the need for some States to differentiate between the Part 20 decommissioning rule for release of land, buildings and structures at the time of license termination, and the release of materials for unrestricted use. We will be corresponding with you separately on this issue.

If you have any questions regarding this correspondence, please contact me or the individual named below.
