SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
Commitment Regarding the October 2, 1999, Component Cooling Water Pump
4160 Volt Power Cable Failure at Davis-Besse Unit 1

Based on recent discussions between the Nuclear Regulatory Commission Staff and Baltimore Gas and Electric Company, regarding the October 2, 1999, component cooling water pump 4160 volt power cable failure at Davis-Besse Unit 1, Baltimore Gas and Electric Company commits to reviewing the results of the final root cause analysis report from Davis Besse, to assess any need for changes to our aging management program for our saltwater pump motor power cabling subject to wetted conditions. We anticipate that this review and assessment will occur in the very near future, but, in any case, this will be completed prior to the end of the current license period.
