Secretary of the Commission U.S. Nuclear Regulatory Commission Washington, D.C. 20555-0001

Dear Mr. Secretary:

Ci-r

.00

DOCKET NUMBER
PETITION RULE PRM 30-62
(GYFR 57785

1 (m)

JAN 14 P2:41

I should like to express my strong support for new rules for the prevention of nuclear accidents that have been proposed by the Union of Concerned Scientists. Of course, there can be no rules that are absolutely fool proof in the prevention of accidents. However, it seems to me that there are, under current arrangements, a number of needless dangers. Considering the magnitude of the resulting peril, it seems to me that the proposed rules are moderate, reasonable, and promise to contribute materially to containment of the problem.

Sincerely,

William J. Baumol

Professor of Economics, New York University

Professor Emeritus, Princeton University
