OFFICE OF THE
RULEMAKING AND
ADJUDICATION STAFF

DOCKET NUMBER
PROPOSED RULE PR 20
(64FR 35090)

Secretary
US Nuclear Regulatory Commission
Washington DC 20555

Attn: Rulemaking and Adjudications Staff

I am strongly opposed to the disposal of radioactive waste by recycling it into consumer products.

I am appalled to learn that some radioactive metal is already being sold to scrap metal dealers on a case-by-case basis by the Department of Energy. Legalizing the large-scale release of these contaminated materials for recycling is unconscionable.

NO DOSE IS ACCEPTABLE! Exposure to radiation must be avoided as much as possible, not facilitated through relaxed standards.

Sincerely,

Jody Grage Haug
