

To Nuclear Regulation Commission JAN 18 10:59

I am writing to plead, urge and demand that you keep radioactive wastes and materials from nuclear power and weapons isolated from the public and the environment, and prohibit any "releases" from regulatory control! You must prohibit radioactive materials from entering the consumer marketplace or anywhere but licensed radioactive facilities! You must recapture what has been released, and work for an international prohibition on radioactive "release".

Words cannot express the severe urgency, the ~~severe~~ extreme desperateness of this situation!

You must not allow this catastrophe!

Sincerely,

Emily Keene
